

Quick Install Guide for Divinsa's online backup solution:

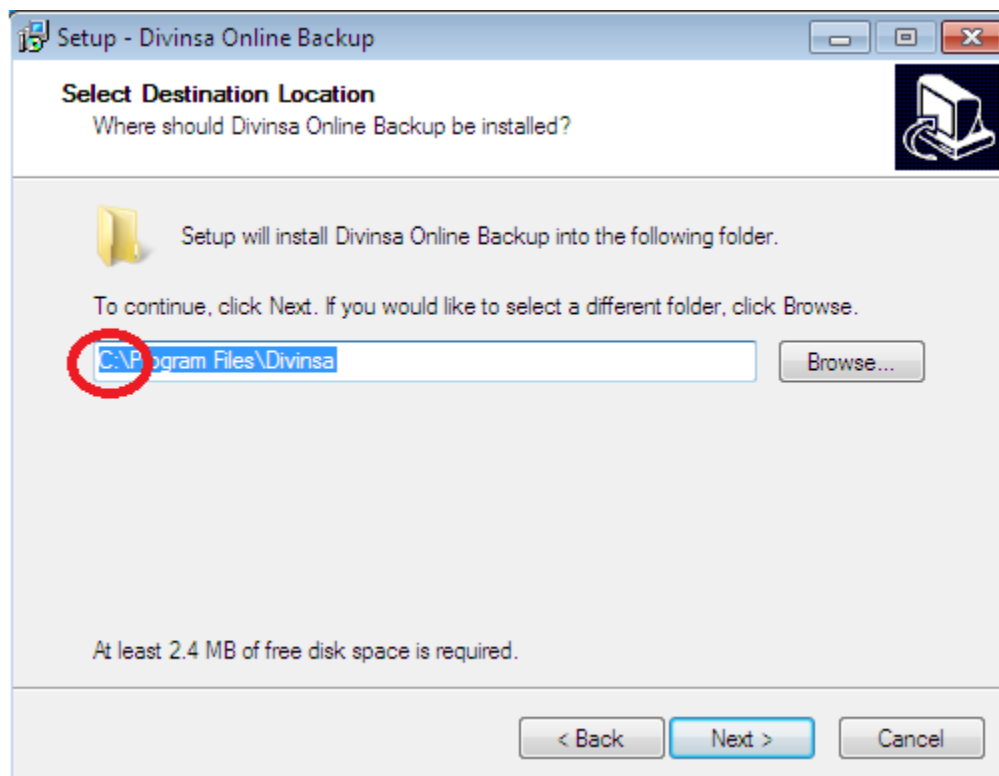

This install guide provides a quick overview of how to install the Divinsa online backup solution. This is not intended to be a comprehensive guide, so please call Divinsa Technical Support at 800-624-9561x102 should you have any questions or require additional information.

Installation Preparation:

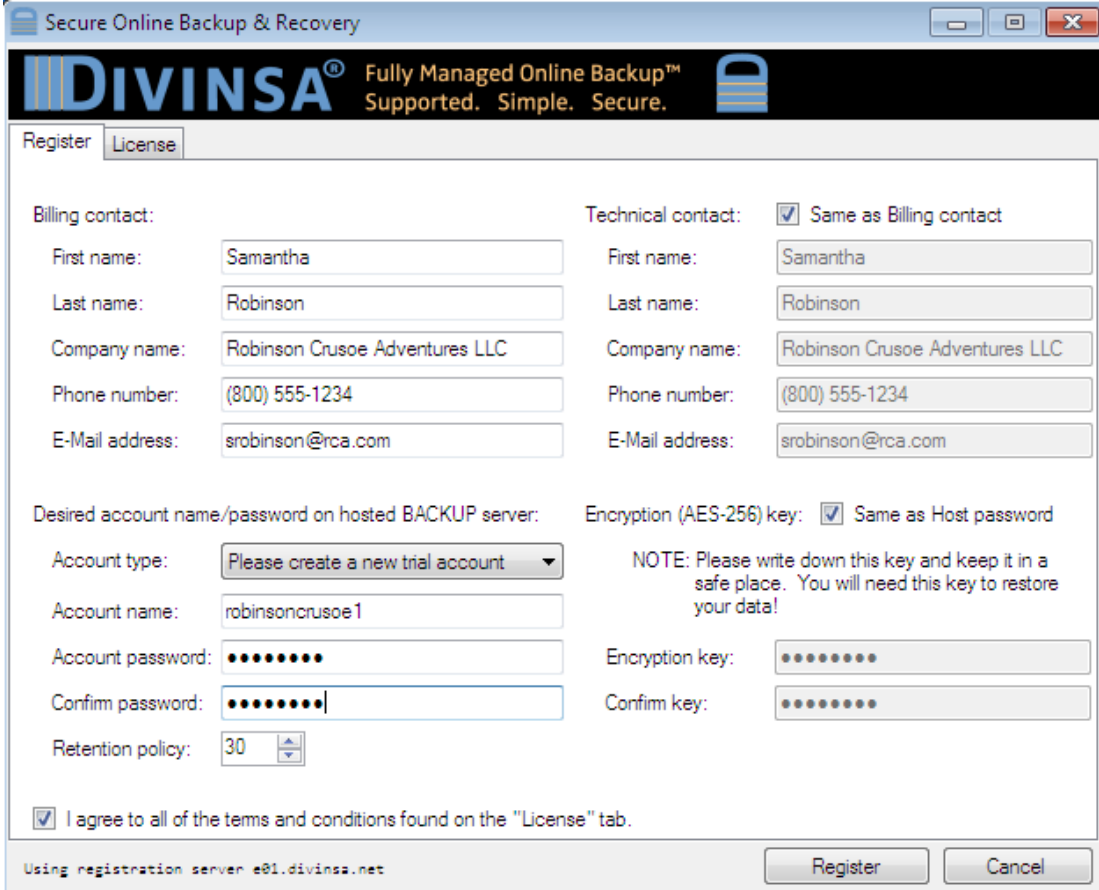

- A. Determine the hard drive with the most free space on it: you will install on this drive below.
- B. Determine the directories and files you wish to back up: you will add these folders to the backup selections below

Installation Steps:

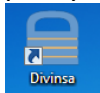

1. Download and run the backup client installer from our website:
<http://www.divinsa.com/trial.htm>
2. Go through the installation screens, and ensure that you install the application on the fixed hard drive with the most free space:

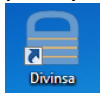

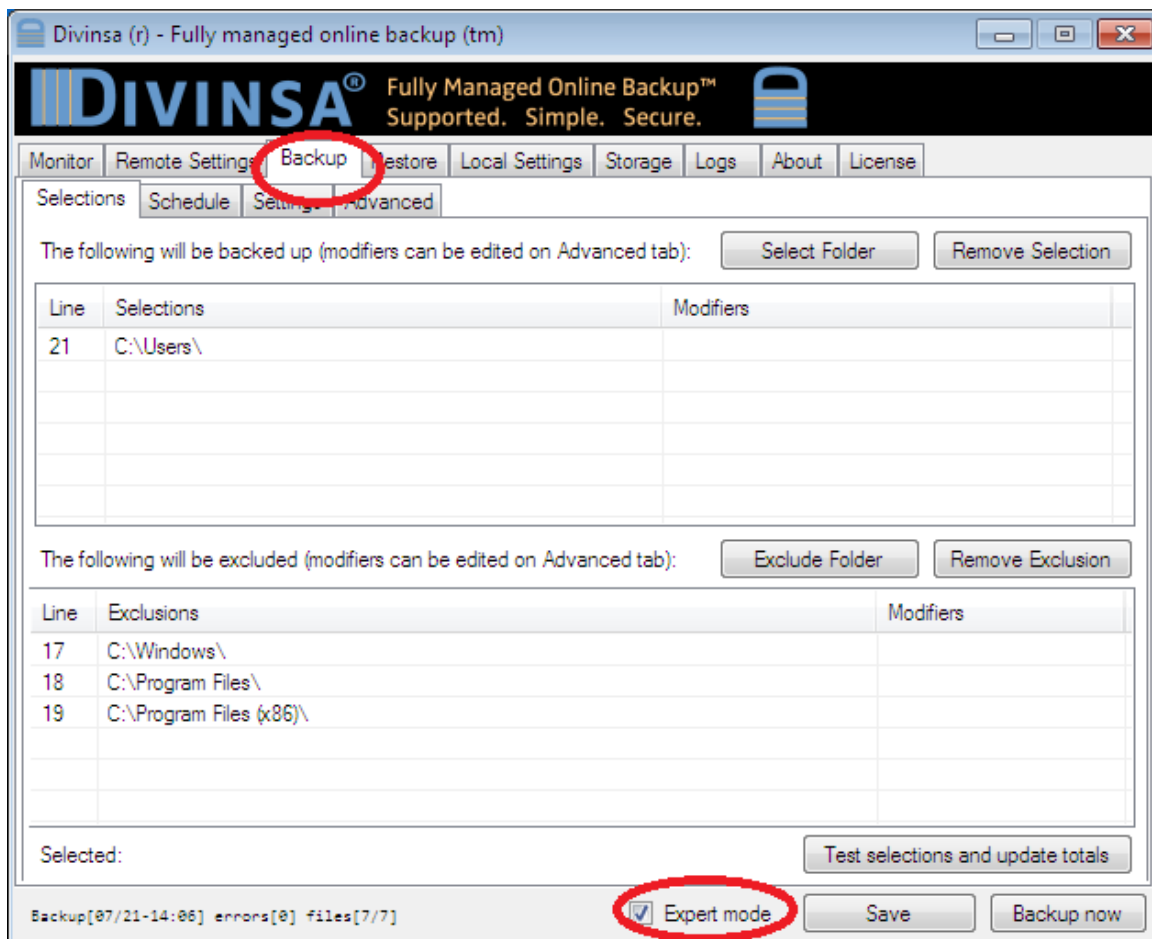

3. Register the new account with the default options, taking care to note the password, as this is also used as your data encryption key, and will be used for any future data restores:

4. By default most every file (except certain Windows system and Program Files) have been selected to backup. To specify less to backup, please:

- a. Run the application (a  icon is placed on your desktop by default)
- b. Select "Expert mode" and then click on the Backup tab (see picture below)
- c. Remove the default selections
- d. Add your selections from preparation step B above
- e. Click on the "Save" button:

5. You're done!
